EXPERIENCE

ACADEMY PETROLEUM INDUSTRIES | Software Developer
Nov 2012 - Present | Edmonton, AB

- Designed and developed rich Internet application to meet business requirements
- Combined multiple technologies to provide best value, including:
  - RESTful API using Ruby on Rails and ActiveModel::Serializers
  - Single-page application using Ember.js and Bootstrap frameworks
  - Reporting engine JasperReports
  - Solr-powered search engine Sunspot
  - MySQL relational database
  - Linux Mint operating system
- Provided system administration and technical support
  - Network management
  - Microsoft Windows, Server and SQL Server, and Ubuntu administration
  - Legacy Microsoft Access and Visual Basic business management software maintenance
- Created Java Swing and single-page application prototypes to help evaluate both approaches

CRAIG & KUMAR MANAGEMENT CONSULTING | IT Analyst
Aug – Oct 2012 | Edmonton, AB

- Developed JAX-WS Web Services on JBoss platform
- Performed administrative task such as updates, back up and configuration changes on VMware ESXi/vSphere, Microsoft Server and SQL Server

SABRE | Software Developer
Jul 2010 – Jun 2012 | Krakow, Poland

- Improved code quality through refactoring and introducing Checkstyle and PMD to provide metrics
- Increased performance by introducing caching to database connectivity
- Debugged application and reviewed code to locate and eliminate concurrency bugs
- Simplified application architecture by replacing ServiceMix binding components connectivity with Camel endpoints
- Developed server monitoring system with JVM statistics and email notifications
